PROFESSIONAL SUMMARY

Software Engineering student at the University of Cross River State (UNICROSS), currently in 400 Level. Builds practical projects using web technologies and Python/Django, with an interest in developing reliable and accessible digital solutions. PHP is currently being learned.

EDUCATION

University of Cross River State (UNICROSS), Calabar
B.Sc. Software Engineering | 400 Level Undergraduate
Expected graduation: [Add year]

SELECTED PROJECTS

- **CampusMarket — Django Marketplace API**
  Developed a marketplace backend project covering product management, authentication, seller functionality, cart and order features. Worked with Django REST Framework, serializers, permissions and filtering.
- **Student Management System**
  Built features for student attendance, course selection, profile management, and book upload/deletion.
- **Netflix Landing Page Clone**
  Created a landing-page recreation using HTML and CSS, with simple JavaScript interaction.
- **Personal Portfolio Website**
  Building a personal website to present technical skills, selected projects and contact information.

EXPERIENCE

Guru Innovation Hub — SIWES / Internship | [Dates]
Practical technology training and development exposure. Add the specific tools used, tasks completed and projects contributed to during the placement.

Freelance Web Development | [Dates, if applicable]
Add a brief description of freelance work, client projects and deliverables. Keep this section only if it reflects work you have actually completed.

LEADERSHIP & INVOLVEMENT

Add official role(s), organization(s), dates and key contributions here. Highlight responsibilities such as communications, event coordination, teamwork or project support where applicable.
